```

Submitting Your Feed

- Create a sample feed of 50-100 ads with content you are planning to post.

- You will need to convert the zip code or city to the correct backpage city URL. Example, Los Angeles would be imported into the site http://losangeles.backpage.com.

- You will also need to convert your categories to our categories. You can find our categories further below.

- Contact sales@backpage.com to request a feed setup. Be sure to include a link to your sample feed. The link is the location where we will pick up the feed. It may be an http:// or https:// web address.

- If you would like to password protect your feed, be sure to provide a username and password.

- Provide an email address(s) where you would like to have daily success and error reports sent.

- After your feed has been pulled successfully, it will be reviewed by Backpage staff and set to run live once it has met our criteria.

- The content of your feed will be given placement prioritization based on the content quality of the feed.

- Content must contain contact information for the consumer to easily reply to a posting.

- The title (or headline) of the ad. The **<title>** is limited to **100 characters** and **cannot** contain any HTML

- HTML is permitted in the **<description>**. Please wrap the ad within a **<![CDATA[]]>** section.

Required Elements

- **<backpage:import>:** This will be the email address tagged for all postings created on the site. Postings may be accessed from a user account on backpage.com using this email address.

- **<backpage:site>:** This is the backpage city site you want the content to appear.

- **<backpage:id>** - A unique id tied to the ad. This id will allow you to update ads in the database with matching ids.

- **<backpage:category>** - Category is a required element that matches a specific Backpage.com category key. For a full list of keys, please refer to the category list below.

- **<backpage:replyEmail>** - The email that should be associated with this ad and optionally used for replies. This element is required.

- **<backpage:allowReplies>** - Specifies if this ad allows replies directly to the reply email, allows replies but does so anonymously thus masking the reply email, or doesn't allow replies at all. This element is required. The possible values are: **Show Email, Anonymous, No**

  Example: <backpage:allowReplies>No</backpage:allowReplies>

- **<backpage:region>** - The region is the location of the ad. It is most likely a city. This element is required.

Additional Backpage Elements

The following elements are either optional or conditionally required based on the category the ad is to appear within. With the exception of the **<description>**, HTML is not permitted within any element and all values are limited to **255 characters**.

- <**backpage:since>** We recommend this field to store the time and date ad was created on the client side. The script on your side would then only return newest ads. This will help make sure that we only get new ads as of a specific time, and it will also add flexibility to roll that time back when needed. Backpage only imports new or updated ads when pulling content. Therefore it is not necessary to send your entire feed on a daily basis.

  Example: <backpage:since>2012-04-20+01:20</backpage:since>

- **<backpage:SourceUrl>** Optional element. We may in the future include this URL at the bottom of the Backpage posting as the source of the content.

- **<backpage:adPlacedBy>** - The ad placed by element is a Rentals and Real Estate specific element. It is required for the category of ApartmentsForRent. It is optional for all other categories.

  Possible values are: **Owner/Property Manager, Agency/Locator Service**

  Example: <backpage:adPlacedBy>Agency/Locator Service</backpage:adPlacedBy>

- **<backpage:feeStatus>** - The fee status element is a Rentals and Real Estate specific element. It is required for the category of ApartmentsForRent. It is optional for all other categories.

  Possible values are: **Fee, No Fee**

  Example: <backpage:feeStatus>Fee</backpage:feesStatus>

- **<backpage:bedrooms>** - Optional element. Possible values: **Studio, 1, 2, 3, 4, 5, 6, 7, 8**

  Example: <backpage:bedrooms>2</backpage:bedrooms>

- **<backpage:roommates>** - Optional element. Possible values: **Male Only, Male Preferred, Female Only, Female Preferred, Male or Female OK**

Example: <backpage:roommates>Female Only</backpage:roommates>

- **<backpage:mapAddress>** - Optional element. If used, the <backpage:mapZip> element needs to be used as well.

  Example: <backpage:mapAddress>202 Mockingbird Lane</backpage:mapAddress>

- **<backpage:mapZip>** - Optional element. If used, the <backpage:mapAddress> element needs to be used as well.

  Example: <backpage:mapZip>10003</backpage:mapZip>

- **<backpage:petsAccepted>** - Optional element. Multiple values allowed. Possible values: **Cats Ok, Dogs Ok**

  Examples:

  <backpage:petsAccepted>Cats Ok</backpage:petsAccepted>

  <backpage:petsAccepted>Dogs Ok</backpage:petsAccepted>

- **<backpage:price>** - Optional element. Non-negative decimal values only.

  Example: <backpage:price>1150.00</backpage:price>

- **<backpage:workStatus>** - Optional element. Multiple values allowed.

  Possible values: **Full-time, Part-time, Temp/Contract, Internship**

  Examples:

  <backpage:workStatus>Full-time</backpage:workStatus>

  <backpage:workStatus>Part-time</backpage:workStatus>

- <**backpage:shift>** - Optional element. Possible values: **Days, Nights, Weekends. Multiple values allowed**

  Examples:

  <backpage:shift>Nights</backpage:shift>

  <backpage:shift>Weekends</backpage:shift>

- **<backpage:education>** - Optional element.

  Example: <backpage:education>Bachelor's Degree</backpage:education>

- **<backpage:salary>** - Optional element.

  Example: <backpage:salary>$18/hour to start</backpage:salary>

- **<backpage:remove>** - Optional element. The value yes will tell the importer to remove the post.

  Example: <backpage:remove>yes</backpage:remove>

Categories (not bold)

The categories names to be used in your feed are listed below and sorted by section. You will also need to convert your categories to our categories. You can find our categories further below in this documentation.
